

## Financial Information Package (unaudited) iA Financial Corporation Inc.

For the Second Quarter of 2019
At June 30, 2019

Financial Group
iA Financial Group is one of the largest insurance and wealth management groups in Canada, with operations in the United States. Founded in 1892, it is one of Canada's largest public companies and is listed on the Toronto Stock Exchange under the ticker symbols IAG (common shares) and IAF (preferred shares). iA Financial Group serves over four million clients, employs more than 6,800 people and is backed by a network of some 25,000 advisors.
iA Financial Corporation Inc. ("iA Financial Corporation" or the "Company") became the parent company of Industrial Alliance Insurance and Financial Services Inc. ("iA Insurance") as of January 1, 2019, pursuant to a plan of arrangement. Under the terms of the arrangement, iA Financial Corporation is a "successor issuer" and the financial information presented for comparison purposes is the same as that of iA Insurance. Certain information related to the operations of iA Insurance is presented separately in this document.

## Basis of Presentation

All amounts in this document are presented on an IFRS basis unless otherwise indicated and except for some specific measures (see Non-IFRS Financial Information below). Amounts are expressed in millions of Canadian dollars unless otherwise indicated.

Certain prior period amounts have been reclassified to conform to the current period's presentation.

## Non-IFRS Financial Information

iA Financial Corporation reports its financial results and statements in accordance with International Financial Reporting Standards (IFRS). It also publishes certain financial measures that are not based on IFRS (non-IFRS). A financial measure is considered a non-IFRS measure for Canadian securities law purposes if it is presented other than in accordance with the generally accepted accounting principles used for the Company's audited financial statements. These non-IFRS financial measures are often accompanied by and reconciled with IFRS financial measures. For certain non-IFRS financial measures, there are no directly comparable amounts under IFRS. The Company believes that these non-IFRS financial measures provide additional information to better understand the Company's financial results and assess its growth and earnings potential, and that they facilitate comparison of the quarterly and full-year results of the Company's ongoing operations. Since non-IFRS financial measures do not have standardized definitions and meaning, they may differ from the non-IFRS financial measures used by other institutions and should not be viewed as an alternative to measures of financial performance determined in accordance with IFRS. The Company strongly encourages investors to review its financial statements and other publicly-filed reports in their entirety and not to rely on any single financial measure.
Non-IFRS financial measures published by the Company include, but are not limited to: return on common shareholders' equity (ROE), core earnings per common share (core EPS), core return on common shareholders' equity (core ROE), sales, net sales, assets under management (AUM), assets under administration (AUA), premium equivalents, deposits, sources of earnings measures (expected profit on in-force, experience gains and losses, strain on sales, changes in assumptions, management actions and income on capital), capital, solvency ratio, interest rate and equity market sensitivities, loan originations, finance receivables and average credit loss rate on car loans.

${ }^{1}$ Non-IFRS measures. See glossary at the end of this document for definitions.
${ }^{2}$ In Q4-2018, the Company made an adjustment to the estimates used to establish income taxes payable in prior periods by decreasing the retained earnings as at January 1,2017 by $58 \$$.
${ }^{3}$ Applied on a quarterly basis
${ }^{4}$ All amounts prior to 2018 have been revised to reflect the fact that the US Operations are presented separately
${ }^{5}$ In Q3-2018, an adjustment was made retroactively to January 1, 2018, further to the application of IFRS-15.

*Note: Actual results can differ significantly from the estimates presented in this page for a variety of reasons. See the Management Discussion and Analysis document for more details.
${ }^{1}$ Non-IFRS measures. See glossary at the end of this document for definitions.
${ }^{2}$ S\&P/TSX is a proxy that can move differently than our equity portfolio, which includes international public equity and private equity.
${ }^{3}$ New capital regime effective as at January 1,2018 . The AMF capital guideline is comparable to OSFI's LICAT.
${ }^{4}$ In Q4-2018, the Company made an adjustment to the estimates used to establish income taxes payable in prior periods by decreasing the retained earnings as at January 1,2017 by $58 \$$.
${ }^{5}$ Compared to actual levels of the index on the dates shown.
${ }^{6}$ Capital sensitivities are disclosed once a year with Q4 results and in other quarters if judged necessary
${ }^{7}$ Impact on net income on a full-year basis.
${ }^{8}$ Interest rate variation represents an immediate parallel change in interest rates (entire yield curve), at quarter-end.
${ }^{9}$ Credit spread variation represents an immediate parallel change in credit spreads across the entire yield curve, at quarter-end.

${ }^{1}$ Price-to-earnings multiple: closing price of the common share at the end of the period divided by the diluted earnings per common share for the last twelve months.
${ }^{2}$ In Q3-2018, an adjustment was made retroactively to January 1, 2018, further to the application of IFRS-15
${ }^{3}$ In Q4-2018, the Company made an adjustment to the estimates used to establish income taxes payable in prior periods by decreasing the retained earnings as at January 1,2017 by $58 \$$
${ }^{4}$ Total payout ratio: sum of common dividends paid and common shares repurchased (buybacks) over the last twelve months divided by the net income available to common shareholders over the last twelve months
${ }^{5}$ Capital yield: sum of common dividends paid and common shares repurchased (buybacks) over the last twelve months divided by the market capitalization at the end of the period.
${ }^{6}$ Total return on common shares: sum of the dividend per common share paid over the last twelve months and the common share appreciation or depreciation over the same period divided by the closing price of the common share at the end of the period preceding the last twelve months.

${ }^{1}$ In Q4-2018, the Company made an adjustment to the estimates used to establish income taxes payable in prior periods by decreasing the retained earnings as at January 1,2017 by $58 \$$.
${ }^{2}$ In Q3-2018, an adjustment have been made retroactively to January 1, 2018 following the application of IFRS-15.

Assets under administration - All assets with respect to which the Company acts only as an intermediary between a client and an external fund manager.
Assets under management - All assets with respect to which the Company establishes a contract with a client and makes investment decisions for amounts deposited in this contract.
Capital structure - Total of Company equity, participating policyholders' accounts and debentures.

## Car loans

- Finance receivables - Car loan receivables before provisions, including accrued interests and liabilities.
- Loan originations - Refers to new car loans disbursed in a given period.

Classification of contracts - Contracts are classified into one of the following categories:

- Insurance contract - Contract under which the Company accepts a significant insurance risk from the policyholder by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder. The Company has classified most of its contracts as insurance contracts. The revenue associated with these contracts is posted as "Premiums" on the income statement.
- Investment contract - Contract that does not involve a significant insurance risk for the Company. Financial cash flows associated with these contracts are not posted on the income statement but are rather posted directly on the balance sheet of the Company.
- Service contract - Contract that does not involve any insurance risk for the Company. Administrative Services Only (ASO) contracts fall into this category. The revenue associated with these contracts is posted as "Other revenues" on the income statement.

Core earnings - Diluted core earnings per common share is a non-IFRS measure used to better understand the capacity of the Company to generate sustainable earnings. Management's

 iA Auto and Home) and for investment income on capital.

Dividend per common share - Dividend paid by the Company to its common shareholders in a given period.
Dividend per preferred share - Dividend paid by iA Assurance to its preferred shareholders in a given period.
 number of outstanding common shares for the period, excluding common shares held in treasury.
Finance receivables - Finance receivables contain car loans, accrued interest and fees.
IFRS - Refers to International Financial Reporting Standards.
 which contractual payments are in arrears for 90 days or more in the case of mortgages and 120 days or more in the case of other loans or in foreclosure is assumed to be impaired.

## Premiums and premium equivalents include general fund premiums, segregated fund premiums, and premium equivalents

- General fund premiums: Premiums earned on insurance, annuity and pension contracts as reflected in the Company's income statements. "Net premiums" refer to gross premiums less amounts ceded to a reinsurer.
- Segregated fund premiums: Amounts related to insurance, annuity and pension contracts which are invested in segregated funds. These amounts are reflected in the Company's income statements.
- Premium equivalents: Amounts related to service contracts (such as Administrative Services Only (ASO) contracts) or related to services where the Company is primarily an administrator but could become an insurer if a specific event were to happen. These amounts are not accounted for in the "Net premiums".

Return on common shareholders' equity (ROE) - Ratio, expressed as a percentage, obtained by dividing the consolidated net income available to common shareholders by the average common shareholders' equity for the period.

Sales - Sales is a non-IFRS measure used to assess the Company's ability to generate a new business. They are defined as fund entries on new business written during the period. Net
premiums, which are part of the revenues presented in the financial statements, include both fund entries from new business written and in-force contracts:

- Individual Insurance:

In the Individual Insurance sector, sales are defined as first-year annualized premiums. The net premiums presented in the Consolidated Financial Statements include both fund entries on new business written during the period and on in-force contracts and are reduced by premiums ceded to reinsurers.

- Individual Wealth Management:

Total sales: In the Individual Wealth Management sector, total sales (or gross sales) for general fund and segregated fund products correspond to the net premiums presented in the Consolidated Financial Statements. Sales for mutual funds are defined as deposits and include primary market sales of ETFs.
Net sales: In the Individual Wealth Management sector, net sales are a useful measure because they provide a more detailed understanding of the source of asset under management growth. The change in assets under management is important because it determines the level of management fees recorded in the Consolidated Income Statements under "Other revenues". Sales for segregated funds and mutual funds correspond to net fund entries (gross sales less withdrawals and transfers).

- Group Insurance:

Employee Plans: Sales are defined as fund entries on new business written during the period. They measure the Company's ability to generate new business. In the Group Insurance Employee Plans division, sales are defined as first-year annualized premiums, including premium equivalents (Administrative Services Only). Net premiums presented in the Consolidated Financial Statements are net of reinsurance and include both fund entries on new business written during the period and on in-force contracts. Net premiums for the Employee Plans division are included in the net premiums for the Group Insurance sector, along with those of the sector's two other divisions, Dealer Services and Special Markets Solutions.
Dealer Services - Creditor Insurance: Creditor insurance sales are defined as premiums before reinsurance and cancellations.
Dealer Services - P\&C: P\&C sales are defined as direct written premiums (before reinsurance)
Special Markets Solutions: Sales are defined as premiums before reinsurance.

- Group Savings and Retirement:

Sales: In the Group Savings and Retirement sector, sales include gross premiums (before reinsurance) and premium equivalents, or deposits. The net premiums presented in the Consolidated Financial Statements are after reinsurance and exclude premium equivalents.

- US Operations:

Individual Insurance: Sales are defined as first-year annualized premiums
Dealer Services - P\&C: P\&C sales are defined as direct written premiums (before reinsurance) and premium equivalents.

- General Insurance:
iAAH (Auto \& Home): Sales are defined as direct written premiums
Share price - Price of the Company's share, as traded on the Toronto Stock Exchange under the ticker symbol IAG.
Sensitivity - Sensitivity analysis includes measures that have no IFRS equivalents.

 required capital.
 Financial Institutions and developed in co-operation with the Canadian Institute of Actuaries. This analysis is intended to be a supplement to the disclosure required by International Financial Reporting Standards and to facilitates the understanding of the financial position of companies by both existing and prospective stakeholders to better form a view as to the quality, potential volatility and sustainability of earnings. It provides an analysis of the difference between actual income and the income that would have been reported had all assumptions at the start of the reporting period been realized during the reporting period. The operating profit and income taxes presented in the sources of earnings are non-IFRS measures. Sources of earnings provide additional indicators for evaluating financial performance:

## - Operating profit:

Expected profit on in-force reflects the best estimates determined by management when the budget was prepared (updated quarterly for the savings sectors to reflect the evolution of the stock market and net fund entries). Experience gains or losses represent the difference between the expected profit on in-force and the realized profit. Gain (strain) on sales emerges when the provisions for adverse deviation incorporated into the provisions for future policy benefits are higher than the profit margins incorporated into product prices. Over the years, the provisions for adverse deviation are recovered in the form of profits as the assumptions used for pricing materialize. Changes in assumptions result from the Company ensuring the adequacy of its provisions given the existing economic environment. The Company also does a complete update of all of its valuation assumptions at the end of each year to take into account the most recent developments in the economic and financial environment as well as its own experience in terms of mortality, morbidity, lapse rates, unit costs and other factors.

- Income taxes:

Income taxes represent the value of amounts payable under the tax laws and include tax payable and deferred income taxes. A life insurer's investment income taxes and premium taxes are not included in these amounts.
