1 › General Information

iA Financial Corporation Inc. (iA Financial Corporation) is a holding company listed on the Toronto Stock Exchange and incorporated under the *Business Corporations Act* (Quebec). iA Financial Corporation and its subsidiaries (the "Company") offer a wide range of life and health insurance products, savings and retirement plans, mutual funds, securities, loans, auto and home insurance, creditor insurance, replacement insurance, replacement warranties, extended warranties and other ancillary products for dealer services and other financial products and services. The Company's products and services are offered on both an individual and group basis and extend throughout Canada and the United States.

The Company's Interim Condensed Consolidated Financial Statements (the "Financial Statements") are prepared on the basis of IFRS® Accounting Standards in accordance with IAS 34 *Interim Financial Reporting*, issued by the International Accounting Standards Board (IASB). These Financial Statements do not contain all the information required in a complete annual financial statement and should be read in conjunction with the Consolidated Financial Statements for the year ended December 31, 2025, which are included in the 2025 Annual Report. The material accounting policies used to prepare these Financial Statements are consistent with those found in the 2025 Annual Report, except for items mentioned in Note 2.

The publication of these Financial Statements was authorized by the Company's Board of Directors on November 9, 2026.

2 › Changes in Accounting Policies

New Accounting Policies Applied to Financial Statements beginning on or after January 1, 2026.

Standards or amendments	Description of the standards or amendments and impacts on financial statements of the Company
IFRS 9 *Financial Instruments* and IFRS 7 *Financial Instruments: Disclosures*	*Description:* On May 30, 2024, the IASB published an amendment to IFRS 9 *Financial Instruments* and IFRS 7 *Financial Instruments: Disclosures*. *Amendments to the Classification and Measurement of Financial Instruments* introduces an accounting policy choice relating to the derecognition of financial liabilities settled through electronic payment systems, clarifies the classification and characteristics of some financial asset types and adds new disclosure requirements regarding investments in equity instruments designated at fair value through other comprehensive income and financial instruments with contingent features, including environmental, social and corporate governance events. *Impact:* In accordance with the provisions of the amendment, the Company has applied it on a modified retrospective basis as at January 1, 2026, and as a result, the comparative figures are not restated. The effect is limited to the accounting treatment related to the derecognition of certain financial liabilities which led, on January 1, 2026, to an increase of $10 in *Cash and short-term investments* and an increase in *Other liabilities* of the same amount. This had no impact on the equity of the Company.
Annual Improvements to IFRS Accounting Standards 2024-2025 Cycle	*Description:* On July 18, 2024, the IASB published the Annual Improvements to IFRS Accounting Standards 2024-2025 Cycle. The Annual Improvements clarify situations specific to five standards: • IFRS 1 *First-time Adoption of International Financial Reporting Standards* related to the fact that an entity which had designated a transaction as hedge accounting before the date of transition to IFRS Accounting Standards must meet the qualifying criteria of IFRS 9 *Financial Instruments* to reflect it in its opening IFRS statement of financial position. Otherwise, the entity should discontinue the hedge accounting; • IFRS 7 *Financial Instruments: Disclosures* related to the fact that an entity which is disclosing a gain or a loss on derecognition relating to financial assets in which the entity has continuing involvement shall disclose whether the fair value measurements included significant unobservable inputs as described in the "fair value hierarchy" requirements in IFRS 13 *Fair Value Measurement*; • IFRS 9 *Financial Instruments* related to the fact that when a lease liability is derecognized by a lessee, the difference between the carrying amount of the extinguished liability and the consideration paid are recognized in profit or loss. The amendment also specifies that the initial measurement of trade receivables must be in accordance with "the amount determined by applying IFRS 15 *Revenue from Contracts with Customers*" instead of "at their transaction price", as previously mentioned in IFRS 9; • IFRS 10 *Consolidated Financial Statements* related to the fact that when assessing control, a party might be a "de facto agent" when those that direct the activities of the investor have the ability to direct that party to act on the investor's behalf; • IAS 7 *Statement of Cash Flows* related to the fact that the term "cost method" replaces the term "at cost" regarding the reporting requirements in the statement of cash flows for investments in subsidiaries, associates and joint ventures since the term "cost method" is no longer defined in IFRS Accounting Standards. The provisions of these improvements apply prospectively. *Impact:* No impact on the Company's financial statements.

Future Changes in Accounting Policies

There are no significant changes to the future accounting standards or accounting policies compared to those disclosed in the Consolidated Financial Statements for the year ended December 31, 2025.

4 › Fair Value of Financial Instruments and Investment Properties

Methods and assumptions used to estimate fair values of financial instruments and investment properties are disclosed in Note 6 of the Company's Consolidated Financial Statements for the year ended December 31, 2025.

Fair Value Hierarchy

Disclosures regarding financial instruments and investment properties must be presented as a hierarchy that categorizes the inputs to valuation models used to measure the fair value of financial assets and financial liabilities. The hierarchy gives the highest priority to readily available unadjusted quoted prices in active markets for identical assets or liabilities and lowest priority to unobserved inputs. The three levels of the hierarchy are described below:

Level 1 – Valuation based on quoted prices in active markets (unadjusted) for identical assets or liabilities. Level 1 financial instruments are composed, among other things, of stocks traded on the market.

Level 2 – Valuation model based on inputs other than quoted prices included in Level 1 that are observable on the market for the asset or liability, either directly or indirectly. Level 2 financial instruments are composed, among other things, of bonds and private debts.

Level 3 – Valuation model based on valuation techniques that use significant unobservable market parameters and that reflect management's best estimates. Level 3 financial instruments are composed, among other things, of private equity.

If a financial instrument classified as Level 1 subsequently ceases to be actively traded, it is reclassified into Level 2. If the measurement of its fair value requires the use of significant unobservable inputs, it is directly reclassified into Level 3.

[1] During the nine months ended September 30, 2026, the Company revised the presentation of fair value hierarchy information to more accurately represent the observability of inputs used in valuation models and to better reflect practices observed on the market. Data for the year ended December 31, 2025 have been reclassified to comply with the current period's presentation. An amount of $4,223 of corporate bonds, an amount of $84 of governments bonds and an amount of $222 of segregated funds financial instruments have therefore been reclassified from Level 3 to Level 2 as at December 31, 2025. These reclassifications had no impact on the net income of the Company.

Transfers between hierarchy levels

During the nine months ended September 30, 2026, there were no transfers from Level 2 to Level 3 ($11 for the year ended December 31, 2025). The transfers for the year ended December 31, 2025 were related to the fair value of bonds whose price had remained unchanged for more than 30 days which, according to the Company's internal policy, resulted in a transfer.

During the nine months ended September 30, 2026, the transfers from Level 3 to Level 2 amounted to $56 (none for the year ended December 31, 2025). These transfers relate to increased observability of inputs used in the valuation models of certain bonds.

There were no other significant transfers between hierarchy levels during the nine months ended September 30, 2026 (none for the year ended December 31, 2025).

The Company presents the transfers between hierarchy levels and reclassifications at the quarter-end fair value for the quarter during which the transfer occurred.

The following tables present assets recognized at fair value evaluated according to Level 3 parameters:

[1] During the nine months ended September 30, 2026, the Company revised the presentation of fair value hierarchy information to more accurately represent the observability of inputs used in valuation models and to better reflect practices observed on the market. Consequently, data for the year ended December 31, 2025 have been reclassified to comply with the current period's presentation. These reclassifications had no impact on the net income of the Company.

Gains (losses) included in net income and *Total unrealized gains (losses) included in net income on investments still held* are presented in *Net investment income* in the Income Statement, except for those related to segregated funds net assets, which are presented in *Investment income (expenses) from segregated funds net assets* in the Income Statement.

Investment Properties

During the nine months ended September 30, 2026, an amount of $19 ($46 for the year ended December 31, 2025) presented in *Purchases* for investment properties corresponds to capitalizations.

Valuation for Level 3 Assets

The main unobservable input used in valuation of bonds and corporate loans as at September 30, 2026 corresponds to credit and liquidity risk premiums ranging from 1.05% to 6.83% (0.70% to 6.50% as at December 31, 2025). The credit and liquidity risk premiums are the difference between the expected yield of an asset and the risk-free rate of return. The difference is called a spread and represents an extra compensation for the risk of default of the borrower and the lack of active markets to sell the financial assets. If all other factors remain constant, a decrease (increase) in credit and liquidity risk premiums will lead to an increase (decrease) in fair value of bonds and corporate loans.

The main unobservable input used in valuation of stocks as at September 30, 2026 corresponds to 100% of the net asset value of the shares owned by the Company (100% as at December 31, 2025), which is provided by the general partner of the limited partnership or the manager of the funds. The net asset value is the estimated fair value of the asset minus the fair value of the liability divided by the number of shares outstanding of a limited partnership or a fund.

The main unobservable inputs used in the valuation of the investment properties as at September 30, 2026 are the discount rate, which is between 6.00% and 8.75% (5.75% and 9.00% as at December 31, 2025) and the terminal capitalization rate, which is between 5.50% and 7.75% (5.25% and 7.75% as at December 31, 2025). The discount rate is based on market activity by type of building and by location and reflects the expected rate of return to be realized on investments over the next 10 years. The terminal capitalization rate is based on market activity by type of building and by location and reflects the expected rate of return to be realized on investments over the remaining life after the 10-year period. If all other factors remain constant, a decrease (increase) in the discount rate and terminal capitalization rate will lead to an increase (decrease) in fair value of investment properties.

[1] During the nine months ended September 30, 2026, the Company revised the presentation of information regarding the fair value of *Investment contract liabilities and deposits*. Consequently, the fair value of *Investment contract liabilities and deposits* measured at amortized cost for the year ended December 31, 2025 has been increased by $70. This adjustment had no impact on the net income of the Company.

5 › Management of Financial Risks Associated with Financial Instruments and Insurance Contracts

Effective risk management rests on identifying, assessing, measuring, understanding, managing, monitoring and communicating the risks to which the Company is exposed to in the course of its operations. Risk management is comprised of a series of objectives, policies and procedures that are approved by the Board of Directors and enforced by managers. The main risk management policies and procedures are subject to review annually, or more frequently when deemed relevant. More information regarding the principles, responsibilities, key measures and management practices of the Company's risk management of financial instruments is provided in the shaded portion of the "Risk Management" section of the 2025 Management's Discussion and Analysis, and any relevant updates are presented in the "Risk Management and Sensitivities – Update" section of the Management's Discussion and Analysis – Third Quarter 2026. Those shaded portions are considered an integral part of these financial statements.

Allowance for Credit Losses by Stage

Allowance for credit losses	45	28	12	85
Carrying amount	$ 1,233	$ 209	$ 8	$ 1,450

Considering their nature, other loans have a negligible allowance for credit losses due to their low credit risk.

6 › Derivative Financial Instruments

The Company is an end user of derivative financial instruments in the normal course of managing exposure to equity, currency exchange rates and interest rate risks. Derivative financial instruments are financial contracts whose value is derived from underlying interest rates, exchange rates, other financial instruments or indexes.

The notional amount represents the amount to which a rate or price is applied to determine the cash flows to be exchanged periodically and does not represent direct credit exposure. Maximum credit risk is the estimated cost of replacing derivative financial instruments that have a positive value should the counterparty default. The maximum credit risk of derivative financial instruments as at September 30, 2026 is $1,316 ($926 as at December 31, 2025). The Company's exposure at the end of each reporting period is limited to the risk that a counterparty does not honour the terms of a derivative financial instrument.

7 › Segregated Funds Net Assets

The table below comprises the underlying items for insurance contracts with direct participation features related to segregated funds as well as those for investment contracts related to segregated funds, which is the segregated funds net assets, and shows the composition. The fair value of the underlying items for insurance contracts with direct participation features, which are calculated under the variable fee approach, is equivalent to the *Insurance contract liabilities related to segregated funds* in Note 8 "Insurance Contracts and Reinsurance Contracts", and the fair value of the underlying items for investment contracts related to segregated funds, which are accounted for at amortized cost, is equivalent to the *Investment contract liabilities related to segregated funds* in the Statement of Financial Position.

	$ 106	$ 107	**$ 320**	$ 196

Effective Income Tax Rates

The effective income tax rate for the quarter and for the nine months ended September 30, 2026 is essentially consistent with the Company's statutory income tax rate of 28%.

For the quarter ended September 30, 2026, the effective income tax rate was 29% in comparison to 22% for the quarter ended September 30, 2025. This increase is explained by lower savings from tax-exempt investment income and by lower savings resulting from differences in tax rates on income not subject to tax in Canada.

For the nine months ended September 30, 2026, the effective income tax rate was 28% in comparison to 18% for the nine months ended September 30, 2025. This increase is explained by lower savings related to tax-exempt investment income combined with the unfavourable impact of tax legislation changes enacted during the period. The recognition of previously unrecognized tax losses for the nine months ended September 30, 2025 also explains the variation relative to the comparative period. These impacts were partially offset by an income tax recovery related to adjustments related to prior years.
